

## **Ensuring a Sustainable Water Future for Todd Mission**

The City of Todd Mission is committed to securing safe, abundant, and sustainable water sources for our community. This Saturday, May 18, the Mill Creek Water Supply Corporation (Mill Creek WSC) will conduct a crucial vote among its members regarding our city's proposal to acquire the rights and responsibilities to serve water to our residents.

Approval of this acquisition would allow us to implement a comprehensive plan designed to enhance water service within the city limits. Thanks to nearly \$2 million in grant funding, we are prepared to construct a new water treatment facility and integrate it with the existing supply network. This initiative includes upgrading and expanding supply lines, installing fire hydrants, and improving drainage systems to prevent roadway ponding—ensuring more reliable water access and increased safety for Todd Mission residents.

Additionally, this transition would alleviate the current demand on Mill Creek WSC's resources, supporting their capacity to serve outlying areas without the need for rate increases. This strategic enhancement supports the city's growth and development, benefiting all members of the Mill Creek community.
